ARCHITECTURAL HARDWARE & METAL COMPONENTS

PRECISION METAL PRODUCTS. TRUSTED MANUFACTURING. GLOBAL REACH.

Product catalogue

An introduction to our sash weights, window fasteners and architectural fittings. Contact our team with your product codes, quantities and specifications for a quotation.

Specification-led enquiries

Materials, dimensions, weight, finishes, customisation and packaging are confirmed for each enquiry. Contact us via Call (+91 99112 57705), WhatsApp (+91 74560 36897), Landline (+91 5717967319) or Official Email (sales@rmmetalsoverseas.com).

RMM-011 / SASH WEIGHTS

Steel Sash Weights

Steel sash weights designed for traditional and modern sash window counterbalance applications.

Available specifications and dimensions should be confirmed according to customer requirements. Share the required mass, profile, length and cord-hole arrangement.

MATERIAL

Steel; grade to be confirmed.

SPECIFICATION & SUPPLY

Dimensions, weight and finishes: confirm with enquiry.
Customisation: subject to feasibility review.
Packaging: pack quantity, protection and labelling to be agreed.

RMM-012 / SASH WEIGHTS

Lead Sash Weights

Lead sash weights designed for sash window counterbalance applications, with product specifications available according to project requirements.

Share the required mass, profile, length and cord-hole arrangement for specification confirmation.

MATERIAL

Lead; composition to be confirmed.

SPECIFICATION & SUPPLY

Dimensions, weight and finishes: confirm with enquiry.
Customisation: subject to feasibility review.
Packaging: pack quantity, protection and labelling to be agreed.

RMM-001 / FASTENERS

Fitch Fastener

Architectural window hardware designed for securing compatible window systems.

Confirm the fixing centres, keeper arrangement and operating requirements for your window.

MATERIAL

Material and grade to be confirmed.

SPECIFICATION & SUPPLY

Dimensions, weight and finishes: confirm with enquiry.
Customisation: subject to feasibility review.
Packaging: pack quantity, protection and labelling to be agreed.

RMM-002 / FASTENERS

Heritage Fastener

A heritage-style fastener for compatible architectural window joinery.

Confirm the window configuration, fixing pattern and keeper dimensions before ordering.

MATERIAL

Material and grade to be confirmed.

SPECIFICATION & SUPPLY

Dimensions, weight and finishes: confirm with enquiry.
Customisation: subject to feasibility review.
Packaging: pack quantity, protection and labelling to be agreed.

RMM-003 / FITTINGS

Eyes

Loop fittings for compatible sash window hardware applications.

Provide the required loop opening, fixing plate dimensions and intended operating arrangement.

MATERIAL

Material and grade to be confirmed.

SPECIFICATION & SUPPLY

Dimensions, weight and finishes: confirm with enquiry.
Customisation: subject to feasibility review.
Packaging: pack quantity, protection and labelling to be agreed.

RMM-004 / FASTENERS

Brighton Fastener

Metal window hardware designed for traditional and architectural window applications.

Confirm the fastener height, fixing centres and keeper arrangement for your project.

MATERIAL

Material and grade to be confirmed.

SPECIFICATION & SUPPLY

Dimensions, weight and finishes: confirm with enquiry.
Customisation: subject to feasibility review.
Packaging: pack quantity, protection and labelling to be agreed.

RMM-005 / FASTENERS

Arm Fastener

Arm-style window hardware for fastening compatible window joinery.

Confirm the arm length, knob option, fixing pattern and keeper configuration.

MATERIAL

Material and grade to be confirmed.

SPECIFICATION & SUPPLY

Dimensions, weight and finishes: confirm with enquiry.
Customisation: subject to feasibility review.
Packaging: pack quantity, protection and labelling to be agreed.

RMM-006 / FITTINGS

Simplex System

Coordinated hardware components for compatible sash window systems.

Supply a component list or drawing so the required parts and system compatibility can be confirmed.

MATERIAL

Material and grade to be confirmed.

SPECIFICATION & SUPPLY

Dimensions, weight and finishes: confirm with enquiry.
Customisation: subject to feasibility review.
Packaging: pack quantity, protection and labelling to be agreed.

RMM-007 / CASEMENT HARDWARE

Casement Stay

Casement stays designed to support and hold compatible casement windows in selected open positions.

Confirm the stay length, fixing arrangement, end profile and window compatibility.

MATERIAL

Material and grade to be confirmed.

SPECIFICATION & SUPPLY

Dimensions, weight and finishes: confirm with enquiry.
Customisation: subject to feasibility review.
Packaging: pack quantity, protection and labelling to be agreed.

RMM-008 / CASEMENT HARDWARE

Casement Fastener

Handle and keeper hardware for fastening compatible casement windows.

Provide the window configuration, required handing and fixing dimensions.

MATERIAL

Material and grade to be confirmed.

SPECIFICATION & SUPPLY

Dimensions, weight and finishes: confirm with enquiry.
Customisation: subject to feasibility review.
Packaging: pack quantity, protection and labelling to be agreed.

RMM-009 / FITTINGS

Lifts

Grip fittings designed to assist the operation of compatible sash windows.

Confirm the mounting plate dimensions, projection and fixing centres.

MATERIAL

Material and grade to be confirmed.

SPECIFICATION & SUPPLY

Dimensions, weight and finishes: confirm with enquiry.
Customisation: subject to feasibility review.
Packaging: pack quantity, protection and labelling to be agreed.

RMM-010 / FITTINGS

D Handle

Pull handles for compatible architectural hardware and joinery applications.

Confirm the overall length, grip clearance, fixing centres and installation requirements.

MATERIAL

Material and grade to be confirmed.

SPECIFICATION & SUPPLY

Dimensions, weight and finishes: confirm with enquiry.
Customisation: subject to feasibility review.
Packaging: pack quantity, protection and labelling to be agreed.

RMM-013 / FITTINGS

Metal Hinge

Metal hinge components for compatible metalwork and architectural applications.

Provide your drawing, mounting arrangement and intended use so dimensions and compatibility can be confirmed.

MATERIAL

Material and grade to be confirmed.

SPECIFICATION & SUPPLY

Dimensions, weight and finishes: confirm with enquiry.
Customisation: subject to feasibility review.
Packaging: pack quantity, protection and labelling to be agreed.
